COLLECTION 2022 / 2023

We love Knitwear!

The People Behind ERIBÉ

It is when life and work is really challenging that our true qualities can be fully appreciated. Without a doubt this past year has been one of our greatest challenges and this is what I have witnessed.

The ERIBÉ team stepped up to the challenge, working long and hard, going the extra mile, taking responsibility for their own job, and working as a team to solve problems wherever they occurred. Our sales agents, suppliers and customers likewise rolled up their sleeves to help, and with such generosity and kindness. ERIBÉ has such lovely, kind and beautiful customers! I thank you one and all!

In 2021 my dream has come true. I see how ERIBÉ really belongs to an ever-growing and wonderful community. Our story starts with the sheep and ends with happy customers loving their ERIBÉ colour! As a post-script to this, the wool is compostable and nourishes the soil, feeding the sheep and beautifying our countryside.

Individually, and collectively, we engage with this cycle, benefitting each other while creating joy, colour, and harmony!

For 2022 we offer a new range of Ecology knitted workwear in British yarn: grown in the UK, spun in Yorkshire, and knitted in Scotland by ourselves. It is naturally soft and comfortable yet practical and hard wearing.

A new Trade Portal will make ordering much easier, and the newly installed, improved company operating system will allow you to see your orders, deliveries and invoices.

Deliveries for all of Europe will be shipped from Poland to support an improved level of customer service.

Last year I recorded videos to present and explain the various elements of our collections. This has been so well received and allowed us to communicate without travelling. You will find up-to-date, freshly recorded videos again in 2022. Our face-to-face contact with everyone in this community has been primarily virtual by on-line video link. This does all work well, keeping us safe and reducing our carbon footprint but if, and when, you can come to visit us in Melrose please know that you will be made very welcome.

I look forward to continuing our journey together in 2022.

Rosemary Eibé

Join the Slow-Fashion Revolution!

From the very beginning, ERIBÉ has been mindful of the environment, choosing to use the best ecological natural yarns and promoting sustainable fashion with every collection. Our colourful knitwear never goes out of fashion and in a world of throw-away clothing, this is slow fashion at its very best. Quality is at the heart of what we do and our knitwear is made to last. It is now more important than ever to consider the environment in the choices we make.

The Problem

Synthetic fibres like polyester, nylon and acrylic are made from plastic. During washing, a garment can potentially lose up to one million microfibrils. These microfibrils do not biodegrade and we do not yet fully understand the damage that plastic microfibrils are doing to us, marine life and the environment.

The Solution - Choose Wool!

By switching to quality natural fibres, you can help us on our mission to help keep plastic microfibrils out of our oceans and food supply. Wool is 100% biodegradable in both soil and sea water and has many unique properties that benefit both the environment and you, the wearer.

100% Natural

Wool is a natural fibre produced by sheep who consume the organic carbon stored in plants and convert it to wool. It is one of the most effective forms of all-weather protection and science is yet to produce a fibre which matches its unique properties.

Durable

The lifespan of wool garments is much longer than those made with synthetic fibres. Buying long-lasting, quality clothing will help slow down the fast-fashion throwaway culture and greatly reduce landfill waste.

Recyclable

The high quality and durability of the wool fibre makes it inherently suitable for re-use and recycling. The mechanical recycling of wool knitwear yields yarns that can then be converted back into knitwear and other useful products.

Renewable & Sustainable

Wool is an entirely renewable fibre source as sheep produce a new fleece every year. Responsible wool producers actively work to safeguard the environment to make the wool industry sustainable for future generations.

Environmental

The natural stain and odour resistant qualities of wool mean that wool knitwear can be washed less frequently and at lower temperatures which has a lower impact on the environment.

Biodegradable & Compostable

At the end of its useful life, wool quickly decomposes in soil, releasing valuable nutrients into the ground. Man-made fabrics break down much more slowly and release polluting micro-particles into the earth and the ocean.

The Wonder of Wool!

Not only is wool one of the most planet-friendly fibres, by wearing wool you can enjoy its many performance benefits: great thermal properties; breathable for maximum natural comfort; and keep warm without overheating. Wool maintains a good appearance for a longer time allowing it to become your favourite garment.

Wool also continues to get softer and moulds to fit your body shape and can be smoothed back to shape after washing. Wool gives you the ultimate in comfort, a favourite garment that lasts many years with the knowledge that you are part of a sustainable future.

Ethical Production from Ewe to You

Like a wonderful extended family, ERIBÉ is all about the people involved; from our wool producers, spinners, mills and suppliers, to our agents, buyers and customers. Great attention is paid to every person involved in our supply chain to ensure the highest standards of ethical production.

We use only the finest quality Merino Lambswool, ethically sourced from top producers and spun in Yorkshire by a family owned company who ensure our yarn is treated with passion and care at every stage of the production process.

Little Things Mean a lot

Here at ERIBÉ HQ we are actively taking steps to reduce our use of plastic and other unsustainable materials. Collectively, if we all do our bit, we believe small changes can make a big difference.

We are replacing plastic garment bags with bags made with a compostable film made from wood pulp, a natural renewable resource which is both biodegradable and compostable.

We have reduced our carbon footprint by using green energy to power our factory.

We have reduced the need for overseas travel by having more meetings online.

We have reduced production of printed materials by providing PDF catalogues and invested in a Trade Portal customer order system accessed via the internet.

We re-use cardboard boxes as much as we can and use recyclable parcel tape made from paper.

The joy of Knitwear

Our life as we knew it has been turned upside down. We must change, adapt and listen to nature and our fellow humanity around this beautiful world we inhabit.

For 2022 we want you to continue to shine, to share your individuality by wearing colour. 10 new colours taken from the most extraordinary and unique animals, insects and flowers have been worked into this season's collection.

As we navigate our way to find the new normal we want you to feel comfortable; supporting local businesses, nurturing and encouraging individuals of all ages. Let us work together to create joy.

Taking centuries of heritage into the 21st Century, I share a piece of Scotland, our fresh air, water and stunning colours, be they bold or soft and subtle.

The RWS (Responsible Wool Standard) is a voluntary standard that addresses the welfare of sheep and the land they graze on. It provides the knitwear industry with a tool to recognise the best practices of farmers; ensuring that wool comes from farms that have a progressive approach to managing their land and respect the highest standards of animal welfare.

The Kinross is so soft that when you first wear it, loose fibres near the surface can rub together form little balls of wool known as pilling or bobbling. For peace of mind, every Kinross garment comes with a complimentary sweater comb. By removing the small pills after each of the first 3-4 washes, the pilling subsides and will eventually disappear.

Caring for your ERIBÉ Knitwear

ERIBÉ creates beautiful knitwear that is warm, soft and very special. We use only the finest natural yarns, most of them spun in Yorkshire, by people who, like us, have an inherited understanding of craftsmanship and a love for what they do.

It is perfectly normal that when you first wear a pure wool garment, loose fibres near the surface rub together during movement and form little balls of wool known as pilling or bobbling. We have put together this simple guide to help you beat the bobbles and keep your ERIBÉ garment looking fantastic for many years to come...

Handwash is best

This is the gentlest way to wash your knitwear and the best way to avoid shrinkage and minimise pilling. Wash by hand in tepid water.

Wash inside out

Any pilling caused by washing will be on the inside not the outside.

Use liquid soap

Add a small amount of liquid hand soap and soak the garment in lukewarm water for 5 minutes. Never use regular washing detergent as this can damage the fibres.

Squeeze, don't rub

To wash the garment you must gently squeeze, without rubbing, the garment in the water. Lay your damp garment on a large bath towel. Gently roll the towel and the garment together much like a Swiss roll to remove the excess water.

Air dry flat

Pull gently to size and allow to dry flat on a clean towel away from direct heat sources such as radiators. When dry, press to shape using a damp towel or lightly steam by holding a steam iron just above the surface of the garment.

Remove any pilling

When the garment is completely dry, gently remove the small pills either by hand or with a hand-held sweater comb or razor - NEVER use scissors. By doing this after each of the first 3-4 washes, you will find that the pilling subsides and will eventually disappear.
